# Read this first

The plan and working kit for the official E-Club NITW website: real reference-site research, sitemap and page specs, the "Ledger" design system with its signature moments, task split for Wahid, Saad and Shroth, SEO and legal checklists (with draft legal pages), the master prompt, and exact GitHub/Vercel steps including how to add collaborators.

## WHAT CHANGED IN THIS VERSION

(1) The four reference sites (IIT Guwahati, Hyderabad, Bombay, Madras) were opened and scrolled in a real browser; findings and screenshots are in Part 2. (2) LinkedIn page URL added. (3) **Deadline: confirm with the institute by Wed 30 Sep 2026** the NIT Warangal name/emblem permission, the subdomain option and the faculty reviewer. (4) No hard build deadline; milestones are proposals. (5) Design gained signature moments none of the four sites has (Part 5).

## Key decisions

| DECISION                                                                 | WHY                                                                                                                                                                |
|--------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Next.js static site, no database or CMS in v1                            | Fast, secure, cheap, crawlable. Content lives in typed data files edited by pull request.                                                                          |
| Venture Vortex first as its own site, later <code>/venture-vortex</code> | Ships without waiting for the main site; shared tokens make the merge a folder copy plus one route.                                                                |
| Own design language, not a clone of any IIT site                         | The four sites show <i>what sections</i> a strong E-Cell site needs; the look comes from the E-Club logo (paper, deep teal, gold) and is deliberately unlike them. |
| Cookieless analytics, no third-party trackers                            | No consent banner needed, fewer legal duties, faster site.                                                                                                         |
| YouTube embeds through a privacy facade; pre-compressed photos           | Google Drive embeds are slow, rate-limited and invisible to search.                                                                                                |

## What is still unverified (honest list)

- **Google SEO verification** needs your domain and a club Google account (Search Console, DNS TXT). SEO is built in; Part 9 lists the checks and targets.
- **Club content** (history, events, team, numbers, sponsors, photos, videos) was not readable from here, so nothing is invented; the data files hold marked placeholders.
- **Legal pages are drafts, not legal advice.** Need faculty/institute review; NIT Warangal name and emblem need written permission.
- **Instagram and LinkedIn** were not opened (login walls).

# Reference-site research

Method: each site was loaded in headless Chrome (1440×900), scrolled top to bottom with screenshots, and inspected for stack, fonts, colours and components (captured 28 Sep 2026). Some sections lazy-load or animate on scroll, so treat this as a strong sample, not a full audit. Screenshots are for internal study only.

|                            | IIT GUWAHATI<br>(ECELL.IITG.IN)                                                                                                                                                                                                                                                         | IIT HYDERABAD<br>(ECELL.IITH.AC.IN)                                                                                                                                                                                                                              | IIT BOMBAY<br>(ECELL.IN)                                                                                                                                                                        | IIT MADRAS<br>(ECELL.IITM.AC.IN)                                                                |

| <b>Palette</b>             | soft grey gradient, black type, dark rounded cards, green CTA                                                                                                                                                                                                                           | pure black, white type, single accent (blue links)                                                                                                                                                                                                               | dark slate #243137 + gold #bd9f67                                                                                                                                                               | pure black, white, thin grey grid lines                                                         |
| <b>Structure</b>           | hero → who we are → initiatives → numbers → guests → backers → contact                                                                                                                                                                                                                  | hero → about + 3 stats → events → speakers → backed by → footer with sponsorship contacts                                                                                                                                                                        | hero → what is E-Cell → stats → initiatives → international reach → speakers → testimonials → footer                                                                                            | cinematic preloader/hero (the only screen my capture reached)                                   |
| <b>Standout components</b> | small initiative "sticker" pills floating around the headline; a fixed floating pill CTA with animated border ("Scavenger Hunt – Riddle") that follows scroll; bento gallery; stat grid beside a big photo with pixel-block corner cut; portrait cards for guests; sponsor logo marquee | wave-line canvas hero; small floating pill nav; horizontal ticker "IDEATE · PITCH · BUILD · LAUNCH · NETWORK"; Events shown as expanding vertical strips with rotated titles; coverflow speaker carousel; blur-in sponsor logos; sponsor CTA block in the footer | double-hairline framed initiative tiles; "our international reach" as a vertical image accordion (GCC, Forbes, Nasdaq, Shibuya); stat trio with line icons; fixed social rail on the right edge | perspective wire-grid "room", ultra-tracked title, odometer-style percent counter as the loader |
| <b>What we take</b>        | the floating conversion pill; stats beside real photography                                                                                                                                                                                                                             | one cheap hero canvas idea; floating pill nav; the ticker; sponsor block in footer                                                                                                                                                                               | proof-driven numbers; iconic-imagery storytelling; hairline frames                                                                                                                              | the <i>feeling</i> of a designed intro, but only as a sub-second moment, never a gate           |
| <b>What we avoid</b>       | grey-on-grey sameness; "updated soon" placeholders                                                                                                                                                                                                                                      | black-on-black monotony; carousel dependence                                                                                                                                                                                                                     | dated Bootstrap look; testimonial carousels; login clutter                                                                                                                                      | hiding all content behind a loader (hurts LCP and SEO)                                          |

## What none of the four does (our opening)

1. **The page is a descent.** Scrolling pulls you into the vortex: the hero spiral scales up and its centre opens (circular clip-path) into the next section. One idea, one scroll-linked animation, zero libraries beyond `motion`.

2. **The 50 startups are a galaxy, not a logo marquee.** Eight sector arms of a spiral; nodes drift; filter dims arms; picking a node writes its name in the vortex core. (Built: `sections/Startups.tsx`.)
3. **Rounds are orbits, not a timeline.** Understand (outer ring) → Build & Sell (middle) → Defend (core). The scroll-linked dot spirals inward.
4. **Round 1 is a dossier reader.** A sticky index of the seven teardown areas beside long-form panels, instead of accordions or cards.
5. **A torn paper edge** (from the poster) into a cream "boardroom" band for the partners.
6. **Violet + chrome + mono** where the others are black, grey or gold.

## Rules distilled

- One signature animation per section, all sharing one easing curve and one stagger.
- Real photography beats illustration; but do not depend on it. The vortex must carry the page with zero photos.
- Numbers need proof or they are cut.
- Never gate content behind a loader. Never autoplay sound. One canvas maximum, only if it earns its bytes.

## What the four sites actually look like

IIT Guwahati – Framer site: orbiting pills, floating CTA, stat grid, portrait cards, sponsor marquee, dark contact card

IIT Hyderabad – black canvas wave hero, pill nav, ticker, expanding event strips, speakers, sponsor block

IIT Bombay – slate and gold, proof stats, framed initiative tiles, image accordion, testimonials

IIT Madras — perspective-grid preloader with odometer counter (the only screen my capture reached)

# Context and decisions

---

## What we are building

The official, public website of the **Entrepreneurship Club (E-Club), NIT Warangal**: who we are, what we run, our past events (photos and videos), the current team, our sponsors and partners, and how to contact or join us. It is the club's permanent home on the web, comparable in scope to the E-Cell sites of IIT Bombay (ecell.in), IIT Hyderabad (ecell.iith.ac.in), IIT Guwahati and IIT Madras. It also hosts the Venture Vortex 2026 page at `/venture-vortex` after the standalone landing page is merged in.

## Known facts

- Club: Entrepreneurship Club (E-Club), NIT Warangal. Email: `e_club@nitw.ac.in`. Instagram: @eclubnitw. LinkedIn: <https://www.linkedin.com/company/entrepreneurship-club-nitw/> (page name teams tag: "Entrepreneurship Club-NIT Warangal").
- Flagship now: **Venture Vortex 2026**, all-India startup strategy competition, ₹50,000 prize pool, within Technozion (NIT Warangal's annual technical fest), final on campus 30–31 Oct 2026. Presented with Master's Union, powered by Unstop, outreach partner School2Startup. Full facts: the Venture Vortex repo's `docs/CONTEXT.md`.
- General secretary: Bhavesh Vaishnav (public name only; his phone number must never appear on the site).
- Tech team: Wahid (head), Saad, Shroth Parek; freshers Satyam and Sumit work on the Venture Vortex landing page.
- Content still to come from the club (do NOT invent): year the club was founded, mission text, verticals/teams, list and dates of past events, stats (members, participants, sponsors, funds), team roster with photos, sponsor list and logos, gallery photos and videos (Google Drive folders: last year's assets received; this year's coming), alumni/startup stories, press mentions.

## Benchmark findings (real browser research, 28 Sep 2026 — full table in

`docs/RESEARCH-E-CELLS.md` )

Opened and scrolled: IIT Guwahati (ecelliitg.in, a Framer site: floating conversion pill, orbiting initiative "stickers", stat grid beside a big photo, portrait cards, sponsor marquee), IIT Hyderabad (ecell.iith.ac.in, Next.js: wave-line canvas hero, floating pill nav, ticker, events as expanding vertical strips, sponsor block in the footer), IIT Bombay (ecell.in, Angular: proof-driven stat trio, double-hairline initiative tiles, "international reach" image accordion, social rail), IIT Madras (ecell.iitm.ac.in, Next.js: perspective-grid loader, ultra-tracked Oswald title). Common backbone: flagship-led hero → numbers → initiatives/events → speakers → sponsors → contact. Common weaknesses: card-and-carousel sameness, dark/grey/gold palettes, placeholder text ("updated soon"), content gated behind loaders. Our opening: The Ledger (paper + deep teal + gold), proof-backed numbers, an events archive with a cursor-following preview, a growth line that draws itself, and a circular "fall into the vortex" transition when you enter the Venture Vortex page.

## Decisions and deadlines

- Venture Vortex is built first as its own site, then merged as `/venture-vortex` .
- **Confirm by Wed 30 Sep 2026** with the institute: (1) written permission to use the NIT Warangal name and emblem on the club's own domain, (2) whether the site can live on an institute subdomain (e.g. `eclub.nitw.ac.in` ) instead of a purchased domain, (3) who at the institute is the faculty coordinator that reviews the legal pages.
- The WhatsApp group link is never public; it is shared only after registration.

## Non-goals (v1)

No login, no payments, no database, no CMS backend. Content lives in typed data files in the repo; the tech team edits them by pull request. Registration for events happens on Unstop or Google Forms.

# Roles and milestones

Team: **Wahid** (head of tech; architecture, Home, SEO, legal integration, deploy, review), **Saad** (events engine, gallery/video, Venture Vortex route), **Shroth Parek** (About, Team, Sponsors, Contact/Join, legal pages). Satyam and Sumit are on the landing page and midsems; add them later for small tasks (image optimisation, content entry).

| OWNER         | OWN THESE PATHS                                                                                                                                                                                                                                             | DELIVERABLES                                           |

| 2    | Events index/detail with real data; Team; Sponsors; About; Venture Vortex merged as <code>/venture-vortex</code> |
| 3    | Gallery + video; legal pages reviewed by faculty; forms; SEO pass; Lighthouse; launch on the new domain          |

## Rules

Same PR workflow as Venture Vortex: branches `name/feature`, PRs to `main`, reviewer ticks the checklist, no direct pushes to `main`. Content changes (adding an event/team member) are PRs that touch only `src/data/*` and `public/images/*`.

# Palette at a glance

# Design system: "The Ledger"

## Concept: "The Ledger"

An entrepreneurship club is about turning ideas into numbers. The site reads like a beautifully printed founder's ledger: warm paper and deep-teal ink, hairline rules, numbered entries, and one gold line that "grows" as you scroll (echoing the rising bars in the E-Club logo). Distinct from Venture Vortex's violet event world, but sharing fonts and structure so the two can live in one codebase.

## Anti-slop rules

Same as Venture Vortex: no gradient blobs, no glassmorphism card grids, no icon-circles above headings, no emoji icons, no Inter/Poppins/Space Grotesk, no corporate clichés, no centred-everything, no lorem ipsum, no stock "diverse team high-fiving" photos. Use real club photography, cropped with intention. Prefer big type, hairlines, tables and numerals over boxes.

## Palette (from the E-Club logo in the poster; confirm against the official logo file)

| TOKEN          | HEX     | USE                                              | CONTRAST                        |
|----------------|---------|--------------------------------------------------|---------------------------------|
| club-ink       | #0b2226 | dark sections, footer                            | —                               |
| club-deep      | #123a40 | raised panels on dark                            | —                               |
| club-teal      | #3b8c96 | graphics, large text ( $\geq 24\text{px}$ ) only | 4.2:1 on ink (fails small text) |
| club-teal-deep | #1d5a63 | text/links on paper                              | 6.9:1 on paper                  |
| club-gold      | #f1c55b | accent, buttons, the growth line                 | 10:1 on ink                     |
| club-paper     | #f5f1e6 | light sections, cards                            | ink on paper 14.6:1             |
| club-mist      | #9fb8ba | muted text on dark                               | 7.9:1 on ink                    |

Rhythm: alternate ink and paper sections. Hero is ink. Content-heavy pages (events archive, team, legal) are paper. Gold button on ink; ink button on paper. Set `data-theme="club"` on `<html>` (default in `tokens.css`); the Venture Vortex route wraps itself in `data-theme="vortex"`.

## Typography

Shared with Venture Vortex. Display: **Bricolage Grotesque**; body: **Instrument Sans**; labels/dates/numbers: **JetBrains Mono** uppercase. Headline sizes clamp(2.5rem, 6vw, 6rem). Body 17–18px / 1.65. Legal pages: body 16px, max 68ch.

## Signature elements

1. **Growth line:** a 2px gold SVG polyline that draws itself down the left rail of the Home page as you scroll (stroke-dashoffset linked to scroll progress), ending at the CTA.
2. **Ledger tables:** events and team use hairline-ruled rows with mono year/date columns instead of cards; hover highlights the row.
3. **Numbered sections** ("02 — What we do").
4. **Photo treatment:** all photos same aspect ratios (4:5 portrait / 3:2 landscape), slight warm grade, `object-fit: cover`, no rounded corners beyond 2px. Team photos in greyscale, colour on hover.
5. Grain overlay at 4%.

## Motion

Same language as Venture Vortex (masked reveals, scroll-linked lines, hover lift, transform/opacity only, Lenis smooth scroll, full reduced-motion support). Page transitions: none (fast beats fancy). Event archive filters animate with layout transitions  $\leq 250\text{ms}$ .

## Components to build (shared library in `src/components/ui/`)

Container, Section (with number label), Button (primary/secondary/link), Nav (sticky, mobile sheet), Footer, LedgerRow, EventRow, EventCard (only for featured), StatNumber, SponsorLogo (uniform 40px height, grayscale→colour), TeamMember (photo, name, role, LinkedIn), Timeline, Accordion (`<details>`), VideoEmbed (lite YouTube facade), Gallery (masonry + lightbox, keyboard accessible), FormField, Toast, Breadcrumbs, TornEdge (from VV), Marquee (pauses on hover/touch and reduced-motion).

## Signature moments (informed by the four reference sites; none of them does these)

1. **Growth line.** A 2px gold line draws itself down the left rail of Home as you scroll and ends at the CTA (echoes the rising bars in the E-Club logo).
2. **Event ledger with a live preview.** `/events` is a hairline-ruled table (year · title · type). Hovering a row makes a photo from that event follow the cursor in a small 3:2 window (desktop only; keyboard focus shows it in place; touch shows an inline thumbnail). Beats the vertical-strip accordions used by two of the reference sites because it scales to 30+ events and works with the keyboard.
3. **Proof numbers.** Stats only appear with a footnote naming the source (e.g. "participants: registration data, Unstop, 2025"). No number, no stat.
4. **Fall into the vortex.** The Home CTA "Venture Vortex 2026" plays a circular clip-path reveal from the button's position that swaps the theme from teal/gold to violet and lands on `/venture-vortex`. Reduced motion: normal navigation.
5. **Sponsor page as a ledger.** "Why partner with us" is a table of verified numbers plus a downloadable one-page summary later; a sponsor block also sits in the footer (borrowed from the IIT Hyderabad pattern).
6. **Team as index cards.** Greyscale portraits with colour on hover; role in mono; year archive via `/team/[year]`.
7. **Floating pill nav.** Small centred pill (the site's only blurred surface) on scroll-down; full header at the top.

## Navigation

Header: Home · About · Events · Team · Sponsors · Gallery · Contact + gold button "Venture Vortex 2026".

Footer: sitemap columns, legal links, email, socials, "Made by the E-Club tech team", © year.

## Data model (typed files in `src/data/` )

`site.ts` (name, url, email, socials), `events.ts` (Event[]: slug, title, type, dateStart, dateEnd, venue, summary, stats, coverImage, gallery[], videold?, sponsors[], registerUrl?), `team.ts` (Member[]: name, role, group, year, photo, linkedin?), `sponsors.ts` . Media in `public/images/{events,team,sponsors}/...` , videos on the club's YouTube channel (embed with youtube-nocookie facade). NEVER embed Google Drive videos (slow, quota limits, not indexable). Photos: originals stay on Drive; commit compressed WebP/AVIF  $\leq 1600\text{px}$  wide ( `scripts/optimize-images.mjs` with `sharp` ).

## Forms (phase 1 → 2)

Phase 1: `mailto:` + Google Form links (Google is the data processor; state it in the Privacy Policy). Phase 2: a Next.js route handler that emails the club through a transactional email API, stores nothing, has a honeypot field and rate limiting.

## Merge plan for Venture Vortex

The VV repo exports `<VentureVortexPage />` from `src/features/venture-vortex/` . To merge: copy that folder to `src/features/venture-vortex/` , copy `src/data/event.ts` and `startups.ts` to `src/data/venture-vortex/` , create `src/app/venture-vortex/page.tsx` that renders it and exports its metadata + JSON-LD, add the nav link, and 301-redirect the old Vercel URL to `/venture-vortex` (or keep it as a subdomain). Tokens are already shared, so no CSS conflicts.

# Kickoff prompts for each teammate

---

## Wahid — shell, Home, SEO, deploy

I am Wahid, head of the E-Club tech team. Follow AGENTS.md. Task 1: build the shared shell in `src/components/ui/` (Container, Section with numbered mono label, Button, Nav with mobile sheet and a gold "Venture Vortex 2026" button, Footer with sitemap columns and legal links) and wire it into `Layout.tsx`. Task 2: build Home per docs/SITEMAP-AND-PAGES.md using "The Ledger" design (docs/DESIGN.md) including the scroll-drawn gold growth line. Facts come from `src/data/*`; where the club hasn't supplied numbers, render only sections that don't need them. Also generate `opengraph-image`, favicon set and manifest. Plan → build → Lighthouse test list.

## Saad — Events, Gallery, Venture Vortex route

I am Saad on the E-Club tech team. Follow AGENTS.md. Task: `/events` (ledger list, filters by type and year, upcoming pinned), `/events/[slug]` (static params from `src/data/events.ts`, Event JSON-LD, gallery with keyboard-accessible lightbox, lite YouTube facade on youtube-nocookie.com), `/gallery`, and later merge the Venture Vortex page as `/venture-vortex` per the merge plan in docs/SITEMAP-AND-PAGES.md. Never embed Google Drive videos. Add each route to `sitemap.ts`. Plan → build → tests.

## Shroth — About, Team, Sponsors, Contact, Join, legal pages

I am Shroth on the E-Club tech team. Follow AGENTS.md. Task: `/about`, `/team` (+ `/team/[year]`, grouped by role, photo only when `photoConsent` is true), `/sponsors` (logo wall with the disclaimer nearby, "why partner with us" section that only uses verified numbers — leave TODO data if unknown), `/contact` (email + socials, no phone numbers; form comes in phase 2), `/join`, and legal routes that render `content/legal/*.md` (do not edit legal text). Add routes to `sitemap.ts`, unique metadata each. Plan → build → tests.

# Git, GitHub and Vercel: exact steps

GitHub and Vercel menus change now and then; if a label differs slightly, look for the closest match.

## 0. Once per computer (everyone)

Install **Node.js 20+ LTS** (nodejs.org), **Git for Windows** (git-scm.com) and **VS Code**. Check in PowerShell: `node -v` and `git --version`. Then set your identity: `git config --global user.name "Your Name"` and `git config --global user.email "the-email-on-your-github-account"`.

## 1. Wahid: create the folders on your PC

Put `setup-repos.ps1` and `eclub-overlay.zip` in one folder, open PowerShell there and run `powershell - ExecutionPolicy Bypass -File .\setup-repos.ps1`. It creates `C:\Users\tipty\venture-vortex` and `C:\Users\tipty\E-club-website`, generates the Next.js projects, copies in the docs, tokens, data, logos and master prompts, installs `motion` and `lenis`, and makes the first commit. Check with `cd C:\Users\tipty\venture-vortex`, `npm run dev`, open `http://localhost:3000`.

## 2. Wahid: create the GitHub account structure

1. Sign in at `github.com` (or create an account with a club-owned email if one exists).
2. **Recommended:** create a free **Organization** so the repos belong to the club and outlive any one student: click your avatar → *Your organizations* → *New organization* → *Free* → name it e.g. `eclub-nitw` → add a second owner (another trusted member) so access is never lost.
3. Create the repo: + (top right) → *New repository* → Owner = the organization → name `venture-vortex` (later `e-club-website`) → **Public** (there are no secrets in these repos, and public avoids Vercel free-plan limits) → leave "Add a README", "gitignore" and "license" **unticked** → *Create repository*.
4. GitHub then shows push commands. In the project folder run:

```
git branch -M main
git remote add origin https://github.com/<ORG>/venture-vortex.git
git push -u origin main
```

The first push may open a browser sign-in; approve it. Repeat for `E-club-website` with the repo name `e-club-website`.

## 3. Wahid: give the team access (collaborators)

Do this per repo. **Repo** → **Settings** → **Collaborators and teams** → **Add people**, type each teammate's GitHub username or email, choose the role **Write**, send. Each person gets an email/notification and must **accept the invitation** (`github.com/notifications` or the email link). Write lets them create branches and open pull requests, which is all they need. Faster for many repos: **Organization** → **Teams** → **New team** ( `tech` ), add members once, then repo → Settings → Collaborators and teams → **Add teams** → `tech` with Write. Everyone needs their own free GitHub account first (`github.com/signup`).

### 3b. Wahid: protect `main` so nobody breaks production

Repo → Settings → Branches → Add branch ruleset / protection rule for `main`: tick **Require a pull request before merging**, **Require approvals: 1**, and (optionally) **Block force pushes**. From now on all work goes through pull requests and a review.

## 4. Everyone: daily workflow

```
git clone https://github.com/<ORG>/<REPO>.git
cd <REPO>
npm install
npm run dev # http://localhost:3000
git checkout -b yourname/what-you-build # e.g. satyam/hero
# ... build, then:
git add -A
git commit -m "hero: masked headline reveal"
git push -u origin yourname/what-you-build
```

Then open the repo on github.com → the yellow banner **Compare & pull request** → fill the checklist → *Create pull request*. Wahid or Saad reviews and merges (green **Merge pull request** button). To start new work: `git checkout main`, `git pull`, new branch. If a PR says "This branch has conflicts": `git checkout main && git pull && git checkout yourname/branch && git merge main`, fix the files with `<<<<<<` markers in VS Code (pick the right lines), then `git add -A && git commit && git push`. Ask Saad if stuck.

## 5. Wahid: deploy on Vercel

1. vercel.com → **Sign Up** → **Continue with GitHub**. Choose the free **Hobby** plan.
2. **Add New...** → **Project** → find the repo → **Import**. If the organization's repos are not listed, click *Adjust GitHub App Permissions* and grant Vercel access to the organization. If Vercel's free plan refuses an organization-owned repo, either transfer the repo to your personal account (repo → Settings → Transfer) or start a Vercel trial; check Vercel's current plan terms.
3. Framework preset: **Next.js** (auto). Do not change anything → **Deploy**. You get `https://<name>.vercel.app`.
4. From now on: every push to `main` deploys to production; every pull request gets its own **Preview URL** (a comment appears on the PR). Teammates do NOT need Vercel accounts.
5. Cookieless analytics: Project → **Analytics** → **Enable**, then `npm i @vercel/analytics` and add `<Analytics />` in `layout.tsx`.
6. **Custom domain (E-Club site, later)**: buy the domain in the club's name (registrar login held by two people) → Vercel → Project → **Settings** → **Domains** → **Add** → copy the DNS records Vercel shows into the registrar. Update `seo.siteUrl` / `site.url` in the data file to the final address immediately (canonical, sitemap and Open Graph read it).

## 6. Later: merge Venture Vortex into the E-Club site

See `docs/SITEMAP-AND-PAGES.md` → "Merge plan". Keep both live until the club site is ready, then merge and 301-redirect.

# SEO, legal and launch checklist

---

## A. Technical SEO (built in)

- [] `metadataBase`, per-page `title` template ("%s | E-Club NIT Warangal"), unique meta descriptions  $\leq$  160 chars, canonical URLs.
- [] `<html lang="en-IN">`; one h1 per page; logical headings; descriptive link text; alt text on every image.
- [] `src/app/sitemap.ts` (all routes + every event slug) and `src/app/robots.ts` (allow all, reference sitemap). Trailing-slash behaviour consistent; `www`  $\rightarrow$  apex 301 redirect.
- [] Open Graph + Twitter cards with a unique 1200×630 image per key page ( `opengraph-image.tsx` can generate them).
- [] JSON-LD: `Organization` (name, url, logo, sameAs = Instagram/LinkedIn/YouTube, contactPoint email) on Home; `Event` on each event page; `BreadcrumbList` on deep pages. Validate every type in Google's **Rich Results Test**.
- [] Favicons ( `icon.png`, `apple-icon.png` ), `manifest.webmanifest`, custom 404.
- [] Static generation for all pages ( `generateStaticParams` for events). No client-only rendering of primary content.
- [] Images: `next/image`, AVIF/WebP, sizes attribute, priority only on the hero image.

## B. Verification (a human must do these — I cannot)

- [] Create the club's own Google account for the club (not a personal one), add two owners.
- [] Google Search Console: add a **Domain property** (DNS TXT record at the registrar), submit `/sitemap.xml`, request indexing of Home.
- [] Bing Webmaster Tools: import from Search Console.
- [] PageSpeed Insights + Lighthouse: Performance  $\geq$  90, Accessibility  $\geq$  95, Best Practices  $\geq$  95, SEO = 100 on Home, Events, Event detail, Team.
- [] Core Web Vitals in Search Console after ~28 days of traffic: LCP  $\leq$  2.5s, INP  $\leq$  200ms, CLS  $\leq$  0.1.
- [] Check "site:yourdomain" and brand searches ("E-Club NIT Warangal", "Venture Vortex") after a week.

## C. Security and privacy

- [] HTTPS only (Vercel default), HSTS; security headers in `next.config` ( `X-Content-Type-Options`, `Referrer-Policy: strict-origin-when-cross-origin`, `Permissions-Policy`, a conservative CSP).
- [] No third-party trackers. Analytics: Vercel Analytics or Plausible (cookieless) — avoids a consent banner. Google Analytics only if you also add a consent banner.
- [] Forms: honeypot + rate limit; no storing of personal data unless the Privacy Policy says so.
- [] No API keys in the repo; `.env.local` git-ignored; secrets only in Vercel settings.

## D. Legal pack (drafts in `content/legal/` — NOT legal advice)

**Deadline to confirm with the institute: Wed 30 Sep 2026** — name/emblem permission, subdomain option, faculty reviewer (see `CONTEXT.md`).

Drafts exist for: Privacy Policy, Terms of Use, Cookie Policy, Disclaimer, Accessibility Statement. **Before publishing:** (1) fill every `[[PLACEHOLDER]]`; (2) get them reviewed by the faculty coordinator or the institute's administration; (3) confirm the club may use the NIT Warangal name and emblem on a site under its own domain — institute names and logos are usually restricted, and the safer path is asking whether the site can live on an institute subdomain (for example `ecclub.nitw.ac.in`) or getting written permission; (4) get permission before showing anyone's photo or name (team members, event attendees, speakers) and honour takedown requests; (5) sponsor and partner logos need the sponsor's consent. India's Digital Personal Data Protection Act, 2023 and its rules apply to personal data you collect; children under 18 need verifiable parental consent, so the site's own forms should be for 18+ or route minors to Unstop/Google Forms.

## E. Domain and hosting

Buy the domain in the club's name, with registrar login held by the club (two admins). Options: `.in` or `.org.in`. Point DNS to Vercel; enable auto-renew. Vercel's free tier is meant for non-commercial use; a student club with sponsor logos is likely fine but read the current terms, or use Cloudflare Pages / Netlify as alternatives.

## F. Launch gate

All above ticked, every page fact-checked against club records, legal pages reviewed, 404 and redirects tested, mobile tested on real phones.

# File structure

Generated from a real `create-next-app` project plus the overlay (builds and lints cleanly). Folders under `app/` are created by their owners.

# Master prompt: paste into your AI

Identical to `AGENTS.md` in the repo.

```
# MASTER PROMPT — E-Club NIT Warangal official website
(Paste this whole file into your AI tool's project instructions. Claude Code, Cursor and Codex read it
from the repo root as AGENTS.md / CLAUDE.md. Also give the AI `docs/CONTEXT.md`, `docs/DESIGN.md`,
`docs/SITEMAP-AND-PAGES.md`.)

## Your role
You are a senior front-end engineer, designer and SEO-aware developer building the official website of the
Entrepreneurship Club (E-Club), NIT Warangal, with a student developer who owns specific pages (they will
tell you which). The output must look like it was designed by a person with taste, not generated: no
template smell. You never invent facts about the club.

## Non-negotiable rules
1. No invented facts. Founding year, member counts, event lists, dates, sponsor names, quotes,
testimonials, numbers, team names: they come only from `src/data/*` or the student. If missing, use an
obvious `TODO` placeholder in data (never in rendered UI copy), and ask. Personal phone numbers never
appear anywhere.
2. Scope. Edit only the paths the student owns (see `docs/TASKS.md`). Ask before touching shared files
(`layout.tsx`, `tokens.css`, `components/ui/*`, `next.config.*`).
3. Stack. Next.js App Router + TypeScript (strict), Tailwind CSS v4, `motion` for animation, `lenis`
for smooth scroll. Static generation for every page (`generateStaticParams` for events). Ask before adding
any dependency; explain the reason and bundle cost.
4. Design. Follow `docs/DESIGN.md` ("The Ledger", incl. its signature moments) and use `docs/RESEARCH-
E-CELLS.md` for inspiration, never for copying: semantic tokens only (`bg-bg text-fg text-muted border-
line bg-accent text-highlight font-display font-mono`), never raw hex. Alternate ink and paper sections.
Hairline rules, numbered sections, mono labels, left-aligned asymmetric layouts, ledger-style rows over
card grids.
5. Anti-slop (hard ban). No gradient blobs/mesh/aurora; no glassmorphism card grids; no icon-in-circle
above headings; no emoji icons; no Inter/Poppins/Space Grotesk; no clichés ("Unleash", "Elevate",
"Empower", "Seamless", "Revolutionary", "Cutting-edge"); no lorem ipsum; no stock-photo people; no
identical 3-up feature grids. Real photos from `public/images`, consistent aspect ratios, minimal radius
(≤ 2px).
6. Motion. One language: masked text reveals (700ms, cubic-bezier(.16,1,.3,1), 40ms stagger, once),
scroll-linked lines, hover lift ≤ 4px, layout transitions ≤ 250ms. Only transform and opacity. Full
`prefers-reduced-motion` support. No page-transition animations. Never delay primary content behind
animation.
7. Performance. Server Components by default; client components only for small interactive leaves.
`next/image` with dimensions and `sizes`; AVIF/WebP; `priority` only on the hero image. Lazy-load below
the fold. Target Lighthouse mobile ≥ 90 (Accessibility ≥ 95, SEO 100), LCP ≤ 2.5s, INP ≤ 200ms, CLS ≤ 0.1.
No layout shift, no long main-thread tasks, no third-party scripts except cookieless analytics.
8. SEO. Every page exports `metadata` (unique title via the template, description ≤ 160 chars,
canonical, Open Graph/Twitter). One h1. Semantic HTML. JSON-LD via helper functions (`Organization` on
Home, `Event` on event pages, `BreadcrumbList` on deep pages). Add every new route to `sitemap.ts`.
Internal links use `next/link` with descriptive text.
9. Accessibility. WCAG 2.2 AA: landmarks, skip link, visible focus, contrast ≥ 4.5:1 (never use `club-
teal` for small text), 44px tap targets, keyboard-operable galleries/menus, alt text, native ``
for accordions, captions for video where available.
10. Media. Videos are YouTube embeds through a lite facade on `youtube-nocookie.com`; never embed
Google Drive videos. Photos are pre-optimised (≤ 1600px, WebP/AVIF) with meaningful alt text. Do not
display any person's photo without the data file recording that consent exists.
11. Privacy and security. No cookies or trackers by default. Forms: honeypot + validation + rate
limit, no storing personal data unless told. No secrets in code; use env vars. External links
`rel="noopener noreferrer"`.
12. Legal. Legal pages render from `content/legal/*.md`. Never write or alter legal text yourself;
flag it for human review. Sponsor/startup/partner logos need the disclaimer wording from
`content/legal/DISCLAIMER.md` nearby.
13. Merge-ready. The Venture Vortex page lives in `src/features/venture-vortex/` and is themed with
```

`data-theme="vortex"` on its wrapper. Do not restyle it with club tokens.

14. **\*\*Code quality.\*\*** Small typed components, named exports, data-driven lists, no `any`, no dead code, comments only where the reason is non-obvious. Run `npm run lint` and `npm run build` and fix errors before declaring done.

## How you behave

- First reply: restate the task in two lines, list files you'll create/edit, ask  $\leq 3$  blocking questions max, then build.
- Prefer finishing one page completely (mobile, desktop, metadata, JSON-LD, sitemap entry) over sketching three.
- When copy is needed and facts are missing, write the layout with obvious placeholder data and list exactly what content the club must supply.
- After coding: give a test list (360/768/1440px, keyboard, reduced motion, Lighthouse) and mention any fact you could not verify.
- If a request breaks a rule, name the rule and propose the compliant alternative. Choose the more restrained design option when unsure.

## Definition of done

Matches the page spec; tokens and data files only; lint/build pass; responsive at 360/768/1440; keyboard + reduced-motion tested; metadata + JSON-LD + sitemap entry present; Lighthouse targets met; PR checklist ticked.

# Legal page drafts

---

## NOT LEGAL ADVICE

Drafts for faculty/institute review. Fill every `[[PLACEHOLDER]]`. They live in `content/legal/`.

## Privacy Policy (draft)

**DRAFT TEMPLATE — not legal advice. Fill every `[[PLACEHOLDER]]` and get faculty/institute review before publishing.**

# Privacy Policy

---

Last updated: `[[DATE]]`

## 1. Who we are

This website is operated by the Entrepreneurship Club (E-Club), NIT Warangal ("we", "us"), a student club of the National Institute of Technology Warangal, Hanamkonda, Warangal, Telangana, India. Contact for privacy questions: `[[NAME, ROLE]]` at `e_club@nitw.ac.in`.

## 2. What personal data we collect

- **Data you send us:** if you email us or submit a form, we receive your name, email address, and the message you write. `[[List exactly what each form collects.]]`
- **Automatically:** basic technical data (IP address, browser, pages visited) processed by our hosting provider and cookieless analytics (`[[Vercel Analytics / Plausible]]`) to keep the site secure and understand usage. We do not use advertising trackers.
- We do not knowingly collect personal data from anyone under 18. If you are under 18, please do not submit forms; use the linked event platform with a parent or guardian.

## 3. Why we use it

To reply to your message, to run and improve the site, to keep it secure, and — only if you ask — to send updates about club events. We do not sell your data.

## 4. Who else handles it

Hosting: `[[Vercel Inc.]]`. Forms: `[[Google Forms / email provider]]`. Event registration for competitions happens on third-party platforms such as Unstop, under their own privacy policies. These providers may process data outside India.

## 5. How long we keep it

Messages: [[12 months]] then deleted. Mailing-list details until you unsubscribe. Server logs: as per the provider's retention.

## 6. Your rights

You may ask us to access, correct or delete your personal data, withdraw consent, or make a complaint, by writing to the contact above. We will respond within [[30]] days. You may also approach the Data Protection Board of India as provided under the Digital Personal Data Protection Act, 2023.

## 7. Photos and videos

Event photos and videos may show attendees. If you appear in an image and want it removed, email us and we will remove it promptly.

## 8. Changes

We will post changes here with a new date.

## Terms of Use (draft)

DRAFT TEMPLATE — not legal advice. Fill placeholders and get review before publishing.

# Terms of Use

---

Last updated: [[DATE]]

By using this website you agree to these terms.

1. **About the site.** The site is run by the Entrepreneurship Club (E-Club), NIT Warangal, a student club, for information about the club and its events. It is not the official website of NIT Warangal unless stated. [[Confirm wording with the institute.]]
2. **Information may change.** Dates, prizes, rules, and schedules of events can change. The event platform (for example Unstop) and official club announcements prevail over this website.
3. **Registrations** for competitions are handled on third-party platforms under their own terms; we are not responsible for those platforms.
4. **Intellectual property.** The E-Club and event names, logos and original content belong to E-Club NIT Warangal. The NIT Warangal name and emblem belong to the institute. Sponsor, partner and startup names and logos belong to their owners and appear only for identification; no endorsement is implied. Do not copy or reuse our content or logos without written permission.
5. **Acceptable use.** Do not attempt to disrupt the site, scrape it in a way that harms it, or submit unlawful, abusive or misleading content through our forms.
6. **External links.** We are not responsible for the content of sites we link to.

7. **Liability.** The site is provided "as is". To the extent permitted by law, we are not liable for losses from using it or relying on it.
8. **Governing law.** Indian law applies; courts at [[Warangal, Telangana]] have jurisdiction.
9. **Contact.** e\_club@nitw.ac.in.

## Cookie Policy (draft)

DRAFT TEMPLATE — update to match what the site actually sets.

# Cookie Policy

---

Last updated: [[DATE]]

This site is built to work without tracking cookies. We use only what is strictly necessary to serve pages securely. [[If using Vercel Analytics or Plausible: "We measure visits with a cookieless analytics service that does not set cookies or track you across sites."]] We do not use advertising or cross-site tracking cookies.

Embedded content: videos are loaded from YouTube's privacy-enhanced domain (youtube-nocookie.com) only after you click play, and Google Forms links open on Google's site under Google's privacy policy.

If we later add analytics or embeds that set cookies, we will ask for your consent first and update this page. You can control cookies in your browser settings.

## Disclaimer (draft)

DRAFT TEMPLATE — get review before publishing.

# Disclaimer

---

Last updated: [[DATE]]

The information on this site is provided in good faith by student volunteers of the E-Club, NIT Warangal, and may contain errors or be out of date. Always confirm event details on the official registration platform or with e\_club@nitw.ac.in.

The site is not an offer of investment, financial or legal advice. References to startups, companies, sponsors and partners are informational; their names and logos are trademarks of their respective owners, and appearing here does not imply endorsement, partnership or sponsorship unless explicitly stated.

Views expressed by speakers, judges or guests are their own.

## Accessibility Statement (draft)

# Accessibility Statement

---

Last updated: [[DATE]]

We want everyone to be able to use this site. We aim to meet WCAG 2.2 level AA: keyboard operability, visible focus, sufficient colour contrast, text alternatives for images, and support for reduced-motion preferences. Some older photos and third-party embeds may not fully meet these standards yet.

If you find a barrier, email [e\\_club@nitw.ac.in](mailto:e_club@nitw.ac.in) with the page address and what went wrong, and we will work on a fix. Response target: [[7]] working days.
